TECHNICAL SKILLS

Programming Languages	: Python.
Web Technologies	: HTML, CSS, and JavaScript.
Frameworks & Tools	: Bootstrap, React, and NPM.
IDE	: Visual Studio

ACADEMIC PROJECTS

Photo Studio Application

- This is one of my internship project done after my course completion.
- Developed and implemented a static web application using HTML, CSS and Bootstrap.
- This is also a user-friendly Photography booking events by contact.
- Utilized the Bootstrap framework to enhance the app's design and layout. Utilized Bootstrap components and styling classes for quick and efficient development.

Ecommerce Web Application

- The React E-Commerce Website is a full-stack web application designed to provide users with a seamless and intuitive online shopping experience.
- Developed using HTML, CSS, and React, this project incorporates modern web development principles to create a responsive, feature-rich e-commerce platform.
- Implemented the design using HTML for structuring content and CSS for styling, ensuring a visually appealing and consistent user interface.
- Utilized React-Js component-based architecture to modularize the application.
- Created individual React components for different sections of the website (e.g., product listings, cart, checkout), promoting code reusability and maintainability.
- Employed CSS for styling and layout, ensuring a visually appealing and consistent design throughout the entire website.

Food Much Restaurant Application

- This is one of the year end projects I developed during my bachelors.
- Developed and implemented a responsive and user-friendly food ordering application using HTML, CSS, and Bootstrap.
- Utilized the Bootstrap framework to enhance the app's design and layout. Utilized Bootstrap components and styling classes for quick and efficient development.
